

REMARKS/ARGUMENTS

Applicants have received the Office Action dated October 19, 2006, in which the Examiner rejected claims 1-23 under 35 U.S.C. § 103(a) as being unpatentable over Constien (U.S. Pat. No. 6,259,932, hereinafter "Constien") and Kikinis et al. (U.S. Pat. No. 5,799,068, hereinafter "Kikinis") and Kulberg et al. (U.S. Pat. No. 5,850,612, hereinafter "Kulberg"). Applicants traverse all claim rejections for the reasons provided below.

Applicants discussed claim 1 with the Examiner over the telephone on January 9, 2007. Specifically, Applicants requested the Examiner to explain the rejection of claim 1 and, in particular, to explain where in the art the Examiner found the limitation of display "external casing in which a plurality of externally exposed recessed cavities are provided." Despite the request, the Examiner did not identify the specific teachings in the prior art that allegedly disclose a display casing with recessed cavities as claimed. The Examiner indicated that he gave this particular limitation no weight. Applicants are unclear why a limitation in a claim would not be given any weight and respectfully request clarification if the Examiner does indeed give the claim limitation no weight. At any rate, to reject a claim under § 103, the Examiner must determine that ALL claim limitations are taught or suggested by the prior. MPEP § 2143.03.

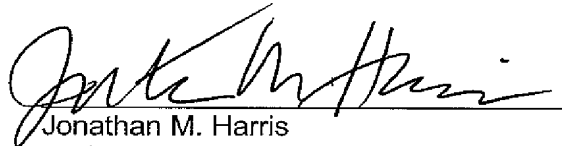

At any rate, claim 1 requires that the display have an external casing "in which a plurality of externally exposed recessed cavities are provided" in which a radio module and an antenna module are received. The Examiner continues to suggest that Constien discloses a display casing in which a plurality of cavities are provided. Specifically, the Examiner identifies element 9 of Figures 1-3 of Constien as being the claimed plurality of cavities. Element 9 in Constien is a retractable antenna. An antenna clearly is not a recessed cavity, much less a plurality of recessed cavities. Antenna 9 resides within in hinge 8, but a hinge can hardly be said to be a recessed cavity within a display casing. Applicants do not find any teaching whatsoever of "a plurality of externally exposed recessed cavities" provided in a casing of a display in which radio/antenna modules are received.

Appl. No. 10/034,224
Amdt. dated January 12, 2007
Reply to Office Action of October 19, 2006

For at least this reason, Applicants contend that claim 1 and claims dependent thereon are allowable over the cited art. The same or similar reasons apply to claims 12-23 as well.

Applicants respectfully request reconsideration and that a timely Notice of Allowance be issued in this case. It is believed that no extensions of time or fees are required, beyond those that may otherwise be provided for in documents accompanying this paper. However, in the event that additional extensions of time are necessary to allow consideration of this paper, such extensions are hereby petitioned under 37 C.F.R. § 1.136(a), and any fees required (including fees for net addition of claims) are hereby authorized to be charged to Hewlett-Packard Development Company's Deposit Account No. 08-2025.

Respectfully submitted,

Jonathan M. Harris
